

Orbiter follow-up: orbit-plane illumination seasons from tracking-based JPL Horizons elements (LRO to 2026-09-02, Danuri to 2026-09-29), extrapolated
(LRO hold-out test: boundaries within 5 days over 1.5-2.5 years; assumes no orbit manoeuvre; a season does not guarantee a sunlit pass over a target) and the scenario impact times
